

[24 Fall] Lab Summary

In this semester, we've had 11 lab practices so far.

We don't have any practice in today's lab. However, there are still lots of stuff that you could do today, including:

- Check-in (签到): You need to correctly answer teacher's or TA's question about `StandardTests.java` in order to mark your attendance.
- Finish 11 lab practices if you haven't done so. **You could confirm your attendance records as well as practice completion status with our TAs.**
- Work on your final project.
- Q&A with teachers and TAs.

All 11 lab practices are due on **week 15's lab**. If you haven't finished them, **please do so before this deadline**. We won't be accepting any submissions after this date.
